DETAILED ACTION

1. Claims 1-74 have been presented for examination. Claims 2-20 have been canceled and new claims 21-74 have been added in a preliminary amendment filed 12/17/1999. Claims 72-74 have been canceled in a preliminary amendment filed 03/29/2002. Claims 1 and 21-71 have been restricted.

Election/Restrictions

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 21-51, drawn to a distributed commerce utility, a secure communications system, a method of routing a secure container, a method of generating a secure container, a method of generating a rule set associated with a secure container, a secure checkpoint, and a network, classified in class 713, subclass 193.
 - II. Claims 52-71, drawn to a first digital certificate, a digital certifying authority, a virtual distribution environment administration node, and a method of generating a first virtual entity certificate, classified in class 713, subclass 156.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP §§ 806.05(c) I. and III.). In the instant case, the combination as claimed does not require the particulars of the

subcombination as claimed because claim 52 recites a digital certificate with issuer identification information and liability protection information, not incorporated in evidence claim 32. The subcombination has separate utility such as issuing a digital certificate for an individual (see claim 61), rather than for a secure container (see claim 32). Therefore, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
